

Task: Calculate your carbon footprint then see what you can do to reduce it.

1. Calculate your carbon footprint :
http://www.zerofootprintkids.com/kids_home.aspx
2. How does it compare with other countries (select 3)
3. Think about the questions you were asked and list some of the things you can do to reduce your carbon footprint
4. Do the test again but change some answers in line with what you have decided in 3
5. Does it make any (big) difference?

Get ready to present your findings to the class
